**Period for Reply**

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133).
- Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

**Status**

- 1) ☒ Responsive to communication(s) filed on 12 May 2003.
- 2a) ☐ This action is **FINAL**.                      2b) ☒ This action is non-final.

**DETAILED ACTION**

***Election/Restrictions***

1. Claims 7-21 are withdrawn from further consideration pursuant to 37 CFR 1.142(b), as being drawn to a nonelected invention, there being no allowable generic or linking claim. Applicant timely traversed the restriction (election) requirement in Paper No. 7.
2. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
3. Applicant's election with traverse of the combined circuit and packet switching in Paper No. 7 is acknowledged. The traversal is on the ground(s) that the two inventions are being capable of use together and are not mutually exclusive. This is not found persuasive because the inventions are unrelated and distinct (refer to the last Office Action).

The requirement is still deemed proper and is therefore made FINAL.

***Claim Rejections - 35 USC § 102***

4. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

Art Unit: 2663

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

5. Claim 1 is rejected under 35 U.S.C. 102(e) as being anticipated by Preston et al (U.S. Patent No.6,493,338).

Preston et al discloses a system for concurrent wireless voice and data communications comprising:

a second, mobile transceiving unit (14);

the first transceiving unit combines and transmits to the second, mobile transceiving unit, voice and data information from the voice and data network, respectively, and receives and separates voice and data information from the second, mobile transceiving unit and routes to the voice network and the data network, respectively; and

the second, mobile transceiving unit combines and transmits to the first transceiving unit, voice and data information and receives and separates voice and data information from the first transceiving unit. See col. 3, line 19-col. 4, line 47 and FIG. 1.

### ***Claim Rejections - 35 USC § 103***

6. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

7. This application currently names joint inventors. In considering patentability of the claims under 35 U.S.C. 103(a), the examiner presumes that the subject matter of the various claims was commonly owned at the time any inventions covered therein were made absent any evidence to the contrary. Applicant is advised of the obligation under 37 CFR 1.56 to point out the inventor and invention dates of each claim that was not commonly owned at the time a later invention was made in order for the examiner to consider the applicability of 35 U.S.C. 103(c) and potential 35 U.S.C. 102(e), (f) or (g) prior art under 35 U.S.C. 103(a).

8. Claims 2-6 are rejected under 35 U.S.C. 103(a) as being unpatentable over Preston et al (U.S. Patent No.6,493,338).

Refer to the discussion for the claim 1. However, Preston does not explicitly teach that the data network is a V.90 modem or ISDN modem coupled to PSTN, or cable modem coupled to a CATV system, or an Ethernet network as recited in the claims. It will be apparent to those skilled in the art that the data networks could be used for the data network of Preston, because the data networks could transport IP data grams. Therefore, it would have been obvious to one having ordinary skill in the art to incorporate a V.90 modem or ISDN modem coupled to PSTN, or cable modem coupled to a CATV system, or an Ethernet network for the data network.

### ***Conclusion***

9. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Soon-Dong Hyun whose telephone number is (703)
